Homework set #5

CSB021: Object Oriented Programming

Dec./25/2015

(Upload your homework to the server before 11:55pm of Jan./7/2016. Please consult with your TA for any questions).

Problem 1: Exercise 20.3, p. 804 of the textbook.

Problem 2: Exercise 20.10, p. 805 of the textbook.

Note: Zip these files (.h, .cpp, .obj, .exe). Name the zipped file using your student number, for example, **Hw5_ fall2015_studentID.zip**, and then upload the compressed file to the server. Also, you shall print out the output on the screen for this problem after executing the .exe. Then collect these results to generate a single .doc document. Finally name this homework document as **Hw5_ fall2015_studentID.doc** and upload it to our server.

In summary, every student is expected to upload 2 files:

Hw5_fall2015_studentID.zip
Hw5_fall2015_studentID.doc
